

COUNSEL OF RECORD REPORT # 11
July 21, 2005

Our client "Update", held on July 2, 2005 in Roosevelt, Utah, on the Felter federal civil action currently before U.S. District Court Judge Roberts in Washington, D.C. was an overwhelming success! I want to thank all of you who were able to attend for filling the meeting hall with positive energy and prayers! The raffle was a success and the food was very delicious.

After I returned from Roosevelt, I went almost a week later to Lawton, Oklahoma to attend a General Council meeting held by my Tribe, the Comanche Nation. I have been working with the Business Committee of the Comanche Nation on reviewing our Constitution and Bylaws. With over 12,000 tribal members living all over the United States, it is a challenge in guiding this project in a way that accounts for all the opinions, criticisms and views of our members. Going from Roosevelt and working with all of you then to Lawton to work with my Tribe kept me very busy. I checked my email every day in Lawton praying that a positive decision in our favor would be forthcoming from Judge Roberts. As of this date, no decision on the defendants' motion to dismiss our case has been issued by the Court.

While in Oklahoma, I was able to learn from the internet news service, Indianz.com, that Judge Royce C. Lamberth issued an order raking the Bureau of Indian Affairs over the coals for its dereliction of duty toward Indians in the Cobell Individual Indian Money Trust Accounting case. I hope that Judge Roberts gets wind of this scathing order against the BIA since he sits in the same Federal District Court as Judge Lamberth.

I told our group of clients at the Roosevelt meeting that we need to keep our eyes and ears open for any information about the Ute Distribution Corporation. Who is actually behind some of those companies that might just have commercial drop boxes as their address of record. I am convinced that the UDC has been keeping a tight lid on any information that might wind up in Congress letting the world know that non-Indians are making a great deal of money out of the immoral termination of the Uintas. Wayne Hummer, Inc. holds itself as an "ethical" company. What would its shareholders think if they find out Hummer is making a great profit from the legacy of a genocidal "hate crime" called the Ute Petition Act.

Until we are able to see the identities those individuals are who stand behind those companies, I will always believe that we might be in for a great surprise. Back in the 1950's and 1960's in and around Roosevelt, the BIA issued "hunting licenses" for non-Indians to go out and get big game in the form of UDC stock certificates, and shares in the Rock Creek Cattle Range and Antelope Sheep Range Companies. None of the non-Indians who got these certificates and shares cared one itty bit about the fact that they

were taking these valuable pieces of paper from unsophisticated Uintas who the BIA failed to protect from the conniving and fraud of these low-brow types, types that would sell their father's and mother's underwear if they could get away with it and make a profit! They had no problem in scamming even minor Uintas out of their valuable shares and UDC stock certificates. It was all about money and snatching the valuables from Indians who they believed were dumb and dirty and didn't deserve the "gold" because they would lose it or drink it away anyway!! Hey, tell it like it is! I get really mad. Has anything changed for the good in Utah? Why all the secrecy, dudes?

Now, how can any competent court allow this sordid low level of chicanery to occur where the true parties that Congress intended to have the benefit of these extremely valuable stocks and shares RIGHT NOW and after their termination in 1954 don't have them and wealthy companies do? Look at the price of a barrel of oil and the importance of water in the West. Those "fat-cat" non-Indians with the Uintas' stock and shares are laughing their way to the bank knowing that our U.S. Congress believes that the UDC is actually composed entirely of successful terminated Uintas, "dark skin" types. Do you think any of these "fat-cats" would even consider doing the right thing and return at least one share or stock back to the Uinta who originally owed it? Hey, these "fat-cat" types got not shame or conscience for what happened to the Uintas beginning in the 1950's - to them its all about \$\$\$ and concept of social justice is nowhere in their greedy little minds. They sleep really sound at night dreaming about how richer they can get out of all of this and keep their starched whites gloves clean from the filth and stench of an Act of Congress, the UPA, that was nothing more than legalized cultural genocide. The Nazis ordered Jews to pull the gold teeth out of their own blood with pliers after they were gassed and heaped in piles to rot. There is nothing different here, my friends.

We must get evidence to Congress about the best kept secret in the world: that non-Indians infiltrated into the UDC in broad daylight while the BIA watched and they now enjoy the wealth and benefits that were taken from the terminated Uintas. Where in the UPA did Congress legislate an amendment to this law that puts non-terminated non-Indians (whites) in an organization, the UDC, that is valid as to its existence only if the terminated Uintas comprise its membership? Didn't Congress create the UDC as a vehicle meant only for those who were terminated to drive and control? When whites got "behind the wheel" and in control of the UDC, termination did not happen as intended by Congress unless the UPA was amended to allow for this. Sounds to me that this fact invalidates the UPA instantly and the terminated Uintas weren't terminated at all. Get read to hand our money and land back over dudes!

Hey, let's switch with the whites on the UDC for a week so they can really see what it is like to be "(ex)terminated" and wondering where they will get money to pay their bills, feed and educate their children so they won't wind up traumatized for life because of the UPA and racism in Utah.

That's what our Felter case is all about. We will continue to tell Congress about this injustice even to our last breath. At the July 2 meeting, I could feel the positive energy and presence of the Spirits of our long gone Uintas who died, hearts torn out and thrown in the ditch. They long for justice and they will be visiting the "fat-cats" and those who acted and continue to act in conspiracy with them (BIA) in the dark of night when they sleep.

Pray in your own way for Spiritual Guidance in our Battle so we will remain together and keep our all of our eyes straight toward the heart of justice.

Dennis G. Chappabitty
Counsel of Record
